

# SCS11RR31™\* brand

**RELATIVE MATURITY:** 113 Days

**KEY FEATURES:**

## AVAILABLE TRAITS

**SCS1131YHR YGCB/HX1/LL/RR2**

Agronomics		Disease		Crop Management	
GDU Silk		Anthrachnose Stalk Rot		Seeding Rate	
GDU Maturity		Diplodia Ear Rot		Nitrogen Application	
Emergence / Vigor		Fusarium Ear Rot		Corn After Corn	
Stalk Strength		Giberella Ear Rot		Less Productive Soils	
Root Strength		Goss's Wilt		Moderately Productive Soils	
Drought Tolernace		Gray Leaf Spot		Highly Productive Soils	
Plant Height		Northern Leaf Blight		Fungicide Response	
Ear Height		Rust		<b>Silage</b>	
Staygreen		Southern Leaf Blight			
Late Season Intactness		<b>Ear and Grain</b>		Silage Yield	
Suggested Use		Test Weight		Silage Quality	
Grain		Ear Flex		Fiber Digestibility	
Silage		Husk Cover		Starch	
High Moisture		Drydown	-	Crude Protein	
				IVTD	

**SEED CONSULTANTS, INC.**

**AGRONOMIC RATINGS KEY:**

9 – Best  
1 – Worst  
S – Short  
M – Medium

T – Tall  
H – High  
– – Not Rated

**EAR TYPE:**

Flex – Flex Ear  
Det – Determinant  
Semi – Semi-Flex

**SOIL TYPE:**

X – Recommended  
Blank – Not Recommended

**NITROGEN CLASSIFICATION:**

Category 1 Hybrids - flower early for maturity, flourish in a weed and feed program; derive less benefit from side dress applications of N; do relatively well at moderate N rates.

Category 3 Hybrids - flower somewhat later; longer grain fill; take up N over a longer period; and derive the most benefit from side dress applications of N as well as higher N rates

Category 2 Hybrids - are somewhere in between

**IMPORTANT:** Trait rating scores provide key information useful in selecting and managing products in your area. Information and ratings are based on comparisons with other products sold by SCI. Information and scores are assigned by SCI and are based on period-of-years testing through 2017 harvest and were the latest available at time of printing. Some scores may change after 2018 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions and a wide range of both climate and soil types and may not predict future results. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision.

**Agrisure®, Viptera®, Agrisure Artesian® and Artesian™** are trademarks of, and used under license from, a Syngenta Group Company. Agrisure® technology incorporated into these seeds is commercialized under a license from Syngenta Crop Protection AG.

**Herculex®** Insect Protection technology by Dow AgroSciences and Pioneer.

**Liberty®, LibertyLink®** and the **Water Droplet Design** are trademarks of Bayer. Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.

**Roundup Ready®, YieldGard®** and the YieldGard® Corn Borer design are registered trademarks used under license from Monsanto Company.

**Supreme EX®** Brand Seed distributed by Seed Consultants, Inc.

**AM - Optimum® AcreMax® Insect Protection system with YGCB, HX1, LL, RR2.** Contains a single-bag integrated refuge solution for above-ground insects.

**AMX - Optimum® AcreMax® Xtra Insect Protection system with YGCB, HXX, LL, RR2.** Contains a single-bag integrated refuge solution for above- and below-ground insects.

**AMXT (Optimum® AcreMax® XTreme)** - Contains a single-bag integrated refuge solution for above- and below-ground insects. The major component contains the Agrisure® RW trait, the YieldGard® Corn Borer gene, and the Herculex® XTRA genes.

**In EPA-designated cotton growing counties, a 20% separate corn borer refuge must be planted with Optimum AcreMax, Optimum AcreMax Xtra and Optimum AcreMax XTreme products.**

**YGCB,HX1,LL,RR2 (Optimum® Intrasect®)** - Contains the YieldGard® Corn Borer gene and Herculex® I gene for resistance to corn borer.

Product performance in water-limited environments is variable and depends on many factors such as the severity and timing of moisture deficiency, heat stress, soil type, management practices and environmental stress as well as disease and pest pressures. All hybrids may exhibit reduced yield under water and heat stress. Individual results may vary.

All products are trademarks of their respective manufacturers.

®, TM, SM Trademarks and service marks of DuPont, Dow AgroSciences or Pioneer, and their affiliated companies or their respective owners.
